

SIXTEENTH
DETAILED
ANNUAL REPORT
OF THE
REGISTRAR-GENERAL
OF
MARRIAGES, BIRTHS, AND DEATHS
IN IRELAND.
1879.

Presented to both Houses of Parliament by Command of Her Majesty.

DUBLIN:

PRINTED BY ALEX. THOM & CO., 87, 88, & 89, ABBEY-STREET,

THE QUEEN'S PRINTING OFFICE.

FOR HER MAJESTY'S STATIONERY OFFICE.

1880.

[C.—2688.] Price 9d.

CONTENTS.

REPORT:—

Population, Marriages, Births, Deaths, and Emigration in 1879 and ten previous years, . . .	5
---	---

MARRIAGES:

Their Number and Proportion to the Population,	6
Causes of Low Marriage-rate in Ireland,	6
Number by each mode of celebration in the years 1869-79,	7
Number of Licences issued by Registrars,	8
Number of Licensing Presbyterian Ministers and of Licences issued by them,	8
Number of Buildings registered for Solemnization of Protestant Marriages,	8
Number of Roman Catholic and of Protestant Marriages registered in each quarter of the years 1876-79,	9
Civil Condition of Persons Married,	9
Ages of Persons Married,	9
Signatures to Marriage Registers and Certificates,	10
Marriage-rate in Provinces and Counties,	12

BIRTHS:

Their Number and Proportion to the Population,	12
Causes of Low Birth-rate in Ireland,	12
Proportion of Illegitimate Births in Ireland and the several Registration Divisions,	13
Number of Multiple Births,	13
Birth-rate in Provinces and Counties,	14
Number in each quarter of the years 1874-79,	14

DEATHS:

Their Number and Proportion to the Population,	14
General Remarks on the Public Health,	15
Death-rate in the Divisions, Provinces, and certain Counties,	15
Number in each quarter of 1879 and previous five years,	15
Causes of Death.—I. Zymotic Diseases,	16
" II. Constitutional Diseases,	23
" III. Local Diseases,	25
" IV. Developmental Diseases,	25
" V. Violence,	25
Inquests,	26
Improvement in the Returns of the Causes of Death,	26
Ages at Death,	26

Emigration from Ireland,	23
Prices of Provisions, and Number of Persons in Receipt of Poor Relief, in 1879 and previous ten years,	27
Summary of Meteorological Observations, 1869-79,	28
Improvement in Registration through Burial Returns obtained under New Public Health Acts,	29

	Page
Table of Meteorological Observations, 1879,	32
Topographical Description of the Eight Registration Divisions of Ireland,	33
Estimated Population of Ireland in each of the years 1801-79,	34

ABSTRACTS:—

Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1879, distinguishing Roman Catholics from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors and of those who signed the Registers by Marks,	35-45
Agas of 13,056 Persons married in 1879, distinguishing those of Bachelors, Spinsters, Widowers, and Widows,	45-47
Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1879; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births,	48-72
Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1879,	74-83
Deaths registered in each of the Four Quarters of 1879 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	84-98
Deaths of Males and Females at different Ages registered in 1879, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	94-101
Causes of Death of Males and Females in Ireland, at different periods of life, in 1879,	102-109
Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1879,	110-113
Causes of Death of Males and Females in Ireland, and in each of the Divisions, in 1879,	114-121
Deaths from several Zymotic and other Causes in 1879, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties,	122-125
Index to Superintendent Registrars' Districts, and Registrars' Districts,	125-133

REPORT

20

His Excellency, FRANCIS THOMAS, EARL COWPER, K.G., &c., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit my Report on the Marriages, Births, and Deaths registered in Ireland during the year 1879, together with the General Abstracts in which the number, season, locality, and special nature of these events are set forth in detail.

Returns prepared from data supplied for the purpose by the Registrars, and containing approximate information on some of the more salient features of the Registration records, in so far as they relate to the Public Health, were issued after the close of each Quarter; and a preliminary Annual Abstract, compiled from the same sources, was presented to Parliament early this year.

The information given in those Returns, necessarily imperfect, has since been carefully revised, and in the Abstracts now submitted the corrected results will be found incorporated with many additional features of general interest and utility.

GENERAL SUMMARY.

The Marriages registered during the year number 23,254; the Births 135,323; and the Deaths 105,089. Both absolutely and in proportion to the estimated population, the marriages and births are under, and the deaths over the annual average for the preceding ten years, the death rate being the highest recorded in any year since Registration was established in Ireland in 1864. The excess in the death-rate is not altogether owing to the increased mortality which it implies, much of it being due to the improvement in registration effected through the Burial

TABLE I.—Showing for each of the years 1869–79, the estimated Population; the number of Marriages, Births, and Deaths registered, and the number of Emigrants enumerated, with the rates per 1,000 of the estimated Population represented thereby, and the averages for the ten years 1869–78.

Years.	Estimated Population in the middle of each year.*	Number Registered.			Number of Emigrants enumerated by the Emigrationers.	Rate per 1,000 of Estimated Population.			
		Marriages.	Births.	Deaths.		Marriages.	Births.	Deaths.	Emigrants.
1869, . . .	6,445,004	27,277	146,689	69,595	66,868	5.01	22.7	10.4	19.2

* See page 34.

Returns obtained under the Public Health (Ireland) Acts, 1878-9, the provisions of which, authorizing these Returns, were put into operation in the course of the year. The causes of the increase in the actual mortality are considered further on.

The recorded natural increase of population, or excess of births over deaths was 30,239, the loss by emigration, 47,065; there would thus appear to have been a decrease of 16,826, in the population during the year, but against a portion of this decrease there is a set-off in immigration of which no official record has been obtained. The estimated population in the middle of the year was 5,362,337.

MARRIAGES.

The number of marriages registered during the year was 23,254, being 1 in every 231, or 4·34 per 1,000 of the estimated population.

This rate is below the low rate yielded by the average annual number of marriages registered during the ten years 1869-78, which was much under the marriage-rates in other countries, the statistics of which are available.

As the subject is of considerable importance, I beg to quote the observations respecting it which were submitted in the Report on the Registration for the year 1875 :—

"There is no doubt that a portion of this disparity [between the marriage-rate in Ireland and that in many other countries], is due to defective registration; but the loss to be set down to this cause is not so great as might at first sight appear and the actual marriage-rate in Ireland, in proportion to the total population is, unquestionably, low.

"This is, in part, accounted for by the abnormal conditions arising from a large annual emigration of unmarried persons of what may be called the marrying ages. The consequent reduction of the sources from which the marriage ranks are recruited is accompanied by an undue increase in the proportion of the population embraced in the other age-periods, and the result tends to produce a low rate compared with the number of inhabitants at all ages.

"Again, amongst the actual population, the marriage-rate is evidently low. Thus, from the last Census Reports it appears that, while in England the per-centage of men aged 20 years and upwards who were unmarried was only 27·1, in Ireland the unmarried formed 38·3 per cent. of the total at the same ages.

"But the returns now under notice in themselves contain proof of the comparative paucity of marriages in Ireland.

"The provisions of the law respecting the registration of Protestant marriages are such that it is all but impossible any should remain unaccounted for; yet, compared, say, with the general marriage-rate for England, the result appears very unfavourable. Thus the average annual rate in England is 1 in every 119 persons, or 8·4 per 1,000 of the population, while the Protestant marriages in Ireland in 1875 only equal 1 in 168, or 5·97 per 1,000 of the estimated Protestant population. [In 1879 the rate was 5·34 per 1,000.]

"There are no grounds for assuming that marriages are proportionately more numerous among the Roman Catholic than among the Protestant inhabitants; so that marriages of the latter, if, indeed, not much over the general rate, are certainly not under it, and the extent to which the registered Roman Catholic marriages fall short of the

rate yielded by marriages of Protestants is the maximum possible loss by non-registration.

"The Roman Catholic marriages registered in 1875 only afford a rate of 1 in 245, or 4.08 per 1,000 of the estimated Roman Catholic population, which, as may be seen, is much under the rate for Protestant marriages. [In 1879 the rate was 4.03 per 1,000.]

"There are no precise data for determining how far this can be satisfactorily accounted for; but, as the Roman Catholic inhabitants constitute the great majority of the people, and include the large mass of the humbler classes, there seems but little doubt that the depression in the marriage-rate, referred to above as resulting from emigration, would be most apparent amongst them, and also that any economic reason leading to a low rate would be likely to affect them to a greater extent than it would their Protestant fellow countrymen.

"It is, however, to be feared that, after making all due allowances, the unregistered marriages, which, as may be gathered from what has been stated above, are confined to those of Roman Catholics, are still numerous.

"There is no valid reason why they should be so. The trouble involved in complying with the law regarding the registration of Roman Catholic marriages is reduced to a minimum, while the individual and the national value of a perfect record is manifest, and ought to secure the willing co-operation of all concerned."

Of the 23,254 marriages registered during the year 1879, 16,528 were between Roman Catholics, 3,646 were celebrated according to the rites and ceremonies of the late Established Church; 2,214 were in Presbyterian Meeting-houses; 338 in "Registered Buildings" belonging to various religious denominations; only 507 by civil contract in the Registrars' offices; 18 were according to the usages of the Society of Friends, and 3 according to the Jewish rite. The small number of marriages in the Registrars' offices (only 2 per cent. of the total) is in striking contrast to the proportion of civil marriages in many other countries.

TABLE II.—Marriages registered in Ireland in 1879 and each of the previous ten years, according to the modes of celebration; with the rate per 1,000 of the population represented:—

Average 1868-78, }	4,506	2,556	503	556	10	2	7,622	18,527	26,346	5.17	4.25	4.59
1879, .	4,048	2,214	338	507	18	3	8,726	16,528	25,254	5.04	4.03	4.54

Of the 3,646 marriages according to the rites of the late Established Church, 69 were by special licence, 3,079 by licence, 383 after the publication of banns, 12 on Registrar's certificate, and in 103 instances there was no information afforded as to which of the foregoing methods was adopted.

During the year 1879 there were issued by the Registrars 695 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1879.	Number of Registered Meeting-houses on 31st December, 1879.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	123	555	2,137
2. Remonstrant Synod of Ulster,	10	19	45
3. Presbytery of Antrim,	4	9	10
4. United Presbytery or Synod of Munster,	3	2	1
5. Northern Presbytery of Antrim,	2	6	7
Total,	142	591	2,206

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1879, there were 1,503 churches and chapels of the late Established Church, 591 registered Presbyterian Meeting-houses, and 309 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show a decrease of 1 as regards the late Established Church, an increase of 1 Presbyterian Meeting-house, and an increase of 4 "Registered Buildings."

The following statement shows the several religious bodies having "Registered Buildings" in 1879:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	165	Church Methodists,	1
Reformed Presbyterians,	37	Covenanters,	1
Independents,	23	United Original Seceders,	1
Baptists,	18	"Protestant Dissenters,"	1
Primitive Wesleyan Methodists,	10	"Christians,"	1
Seceders,	12	Non Subscribing Christians,	1
United Presbyterians,	8	Non Subscribing Unitarians,	1
Methodists, New Connexion,	7	"The Catholic Apostolic Church,"	1
Moravians, or United Brethren,	6	Christian Brethren,	1
Primitive Methodists,	6	Independent Protestants,	1
Evangelical Union,	2	Jews,	1
Unitarians,	2		
Methodists,	2	Total,	309

As more than a moiety of the annual number of Roman Catholic marriages in the provinces of Munster and Connaught are celebrated between Christmas and Shrovetide, the marriages registered in Ireland during the first quarter of the year always largely outnumber those in any of the other quarters. Thus, in 1879 the numbers recorded were—in the first quarter, 8,610; in the second, 4,763; in the third, 4,840; and in the last, 5,041.

TABLE III.—The Number of Roman Catholic and of Protestant Marriages registered in each Quarter during the four years, 1876–79 :—

Total, .	18,930	7,458	17,453	7,264	17,898	7,386	16,538	6,726
General Total,	26,388		24,722		25,284		23,264	

The marriages of bachelors and spinsters constitute 85·6 per cent. of the total; those of widowers and spinsters 8·5 per cent.; of bachelors and widows 3·4 per cent.; and of widowers and widows 2·5 per cent. Thus, 11 in every 100 of the men married were widowers, and 6 per cent. of the women were widows; and in 14 instances in every 100 marriages one or both of the contracting parties had been in the married state before.

A complete registry of the exact ages of the persons married would be valuable from many points of view; hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or "of full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1879 the ages of both parties were specified in only 6,548 instances, being little more than one-fourth of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 23,264 men married during the year, 662, or 2·85 per cent. were minors; and of the women married, 3,153, or 13·56 per cent. were under age. These proportions differ but slightly from the averages for the preceding ten years.

The highest proportion of husbands married under age in 1879, 3·73 per cent., was in the South-Eastern Division; and the highest per centage of wives, 18·48, was in the Western Division.

It may be added, that the per-centage of persons married in Ireland who were under age is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1879, 16,735, or 72.0 per cent. of the husbands, and 15,609, or 67.1 per cent. of the wives, wrote their names, and the remainder signed by marks.

These figures, though still leaving much to be desired, contrast hopefully with the corresponding results eleven years since, the per-centage of persons married in 1869 who wrote their names being—men 63.4, and women 54.3.

As usual, the most favourable results appear in the Eastern or Metropolitan Division, and the least satisfactory in the Western and the North-Western Divisions, the number who wrote their names varying from 80 in every 100 men and 78 in every 100 women in the Eastern, to 61 per cent. of the men married in the Western, and 57 per cent. of the women married in the North-Western division.

The number of marriages registered in each of the eleven years 1869-79; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE IV.—The Number of Marriages in the Eight Registration Divisions of Ireland* during the years 1869-79, and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.

Registration Divisions.*	Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.

	1879	3,301	73.1	57.5	2.28	13.04	10.07

In the province of Leinster, 76·8 per cent. of the men, and 74·8 per cent. of the women married wrote their names; in Munster, 73·3 per cent. of the men, and 68·0 per cent. of the women; in Ulster, 71 in every 100 men, and 63 in every 100 women; and in Connaught, only 61·4 per cent. of the men, and 60·4 per cent. of the women.

In 4,603 instances, both of the parties married signed the register by "mark," and in 4,958 cases the register was thus signed by either the husband or the wife, so that in 9,561 instances, or 41·1 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 13,693 instances, or 58·9 per cent., *both* parties wrote their names.

In proportion to the estimated population at all ages the registered marriages were most numerous in the province of Leinster, in which, however, the rate was only 4·9 per 1,000 persons; Ulster comes next, with 4·4 per 1,000; Munster third, with 3·9 per 1,000; and Connaught last, the rate being 3·8 per 1,000.

The highest rate in any county was 7·3 per 1,000, which was the marriage rate for Dublin; and the lowest 2·9 per 1,000 for Westmeath. Between these, the most favourable were 5·7 for Antrim, 4·7 in Down, 4·5 in Armagh and Londonderry, and 4·4 in Limerick; and the least so 3·3 in Cavan, 3·4 in Carlow and Monaghan, and 3·5 in Kildare.

BIRTHS.

The number of births registered during the year 1879 is 135,328—69,860 boys, and 65,468 girls, or 106·7 of the former to every 100 of the latter—the rate afforded in proportion to the total population being 1 in 39·6, or 25·2 per 1,000, which is considerably under the low average rate (26·8 per 1,000) for the ten years, 1869–78, and less than the rate in any of those years, except 1878, when the rate was 25·1 only.

In the report for the year 1875, the causes of the comparatively low birth-rate in Ireland were considered, and the observations then made are almost equally applicable to the year now under review:—

"It has been seen that the marriages registered in Ireland, when compared with the total population, fall far short of the proportion in England. The births, too, present a contrast—not, indeed, so striking, but still sufficiently so to call for explanation; the average rate in England being 35·4 per 1,000 persons, against 26·9 per 1,000 in Ireland.

"A large portion of the disparity between the marriage rates has been accounted for, and shown to be owing to the special circumstances of Ireland, and it is obvious, that, speaking in general terms, there must be a corresponding difference between the birth-rates.

"Pursuing the inquiry with special reference to births, and omitting, for the present, those of children born out of wedlock, it is found that the average rate of legitimate births in England for the ten years 1865–74 was 33·4 per 1,000 of the population, and that the corresponding rate in Ireland was only 26·1 per 1,000.

"The conclusion at first naturally suggested by these figures is that the registration of births in Ireland must be very defective; but, on examination this proves to be, in great part, erroneous.

"In 1871, according to the Census, the married women in England between the ages of 15 and 55, which may be taken as the limits of the

childbearing period, formed 14·7 per cent. of the total population at all ages, and in Ireland the corresponding proportion was only 11·8 per cent., or, in other words, there were five married women, possible mothers, in England to 4 in an equal number of the population in Ireland. Taking the ages 15 to 45 years, the difference is even greater.

"Assuming the actual births to be in the same ratio to the number of married women in each of the two countries, it is evident that the births in any given number of the total population in Ireland must be less than the corresponding rate in England to the extent that the proportion of married women in the former country falls short of that for the latter.

"This being so, the respective rates for legitimate births, given above, namely, 26·1 per 1,000 persons in Ireland, and 33·4 per 1,000 in England, are reconcilable, as they bear the same ratio to each other as the relative proportion of married women in the population; and, looking at the numbers from another point, it is found that the births in England are annually equal to 224 to every 1,000 married women of the child-bearing ages, and that the registered births in Ireland, equal 223 per 1,000.

"There is a popular opinion that the mothers of Ireland are more fruitful than those of England; but this, if true in the abstract, must, under present conditions, be to a certain extent neutralized by the comparatively late period of life at which many marriages in Ireland now take place."

Of the 135,328 children whose births were registered in Ireland during the year 1879, 131,961, or 97·5 per cent., were legitimate, and 3,367, or 2·5 per cent., were illegitimate. The average per-centage of illegitimate births in the preceding 10 years was 2·5.

It is unnecessary to say that these results compare very favourably with the returns for most other countries.

Of the children born in wedlock during the year, 68,129 were males, and 63,832 females, being 106·7 of the former to every 100 of the latter; and of the illegitimate children 1,731 were males, and 1,636 females, or 105·8 boys to 100 girls.

There were 1,617 twin births and 22 triple births of living children registered during the year, the number of multiple births thus being 1,639, equal to 1 in every 82 deliveries of living children.

TABLE V.—The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years 1875–79, by Divisions.

Divisions.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.

South Midland, .	98·1	98·0	98·2	97·9	97·7	1·9	2·0	1·8	2·1	2·3
Western, .	99·2	99·2	99·2	99·2	99·2	0·8	0·8	0·8	0·8	0·8
South-Eastern, .	97·3	97·5	96·9	97·4	97·2	2·7	2·5	3·1	2·6	2·8
South-Western, .	98·7	98·7	98·7	98·7	98·4	1·3	1·3	1·3	1·3	1·6

As in previous years, the lowest per-centage of children born out of wedlock was in the Western Division, and the highest in the North-Eastern division. The order of the several divisions is as follows:—Western 0·8 per cent. of total births; South-Western and North Midland, 1·6; Eastern, 2·0; South Midland, 2·3; North-Western, 2·5; South-Eastern, 2·8; and North-Eastern, 4·9.

Comparing the provinces, we find that the per-centage of children born in Ulster, who were illegitimate, was 4·0; in Leinster, 2·1; in Munster, 1·9; and in Connaught, 0·7.

The extremes of the county rates are found in Down and Mayo. In the former of 6,038 births registered, 337, or 5·6 per cent. were illegitimate, and in the latter, out of 6,459 births recorded, only 31, or 0·5 per cent. were so classed.

The respective total birth-rates for the provinces in 1879 were—Munster, 25·9 per 1,000 of the population; Connaught, 25·1; Leinster, 25·0 per 1,000; and Ulster, 25·0.

The four counties having the highest rates were—Dublin, 29·8; Kerry, 29·6 per 1,000 inhabitants; Antrim, 29·4; and Mayo, 26·5. Those with the lowest rates were—Fermanagh, 21·5; Wicklow, 21·7; Monaghan, 21·8; and Carlow, 22·0 per 1,000 persons.

Of the total births, 53·1 per cent. were registered in the first six months of the year (181 days), and 46·9 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 35,226; in the second, 36,656; in the third, 32,933; and in the fourth, 30,513.

TABLE VI.—Showing, by Quarterly Periods, the number of Births registered in Ireland in each of the five years 1874–78, and the average number for that period; also the number registered during each quarter of the year 1879:—

DEATHS.

The deaths registered during the year amount to 105,089, being equal to 1 in 51·0 or 19·6 per 1,000 of the estimated population. The deaths of males number 52,263, and those of females 52,821, the former being equal to 20·1 in every 1,000 males living, and the latter representing 19·1 per 1,000 females.

The registered deaths are much over the average for the ten years 1869-78, and more numerous than in any year during that period. As already stated, much of this increase is owing to improved registration, the Burial Returns obtained under the new Public Health Acts bringing under the notice of the Registrars very many deaths which, but for these Returns, would have remained unregistered. Still, allowing for defective registration in previous years, the mortality last year was above the average.

The increase is chiefly attributable to the inclement weather in the earlier months of the year, and a consequent more than wonted prevalence of acute diseases of the respiratory organs, especially amongst the aged.

The mortality from zymotic diseases was 12 per cent. below the average for the preceding ten years, and was less than in any of those years except 1876 and 1877, with which years also it compares favourably if we bear in mind the more complete registration effected.

The deaths from the eight principal zymotic diseases* registered during 1879 form 9·4 per cent. of the deaths from all causes, and are equal to 185 in every 100,000 persons living; the average annual mortality from the same diseases in the preceding 10 years represents 12·0 per cent. of the average number of deaths from all causes, and is equal to 211 deaths in every 100,000 of the estimated mean population.

As heretofore very many of the Registrars furnished at the close of each quarter valuable notes on the sanitary condition of their respective districts. These notes were embodied in the Quarterly Returns issued from this department, and, emanating as they did, from gentlemen qualified to speak decisively on the subject, it is to be hoped that they received the serious attention of the various Local Authorities intrusted with the administration of the Public Health Acts. In this place it will be sufficient to say that the Registrars' observations, while disclosing many lamentable defects in sanitation, point to a gradually extending interest in sanitary questions which must, ere long, be productive of lasting good.

The death-rates in the eight divisions range from 15·6 per 1,000 persons in the Western to 25·1 in the Eastern. The following is the order of the several divisions:—Western, 15·6 per 1,000 persons; North Midland and North Western, 17·3; South Midland, 19·5; South Western, 19·6; South Eastern, 19·8; North Eastern, 20·4; and Eastern, 25·1.

With respect to the four provinces, the rate for Connaught is only 15·7; that for Ulster is 19·2; for Munster, 19·4, and for Leinster, 22·9.

Of the thirty-two counties, the four having the lowest registered mortality are—Sligo, only 14·3 per 1,000; Mayo, 15·2; Longford, 15·2; and Galway, 16·1.

Those in which the rate was highest are—Dublin, 31·3; Westmeath and Antrim, 21·6; and Limerick, 21·5.

The deaths registered in the first half of the year always largely outnumber those in the second. In 1879 57·5 per cent. of the total deaths were registered in the six months, January to June inclusive, and only 42·5 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follows:—First quarter, 24·1 per 1,000 of the population; second, 20·9; third, 15·2; and fourth, 18·1.

* Small-pox, Measles, Scarlet Fever, Diphtheria, Whooping-cough, Ferer, Diarrhoea, and Cholera.

TABLE VII.—Showing, by **Quarterly Periods**, the number of **Deaths** registered in Ireland in each of the five years, 1874-78, and the average number for that period; also the number registered during each quarter of the year 1879:—

QUARTER ENDED	Years and Number of Deaths Registered.							Equivalent Annual Rate per 1,000 of Estimated Population.

CAUSES OF DEATH.

I.—ZYMOTIC DISEASES.

The deaths from Zymotic diseases registered during the year 1879 amounted to 13,336, or 248·70 in every 100,000 of the estimated population. This rate is under the average for the ten years 1869-78, and is less than the rate for any of those years except 1877, which it slightly exceeds. Compared with the ten-year average there was a decline in the mortality from each of the principal diseases in this class except whooping-cough and small-pox, the mortality from which shows an increase—the deaths from the former disease numbering 1,938, against an average of 1,687, and those from small-pox (including 555 in the city and county of Dublin) 672, against an average of 654. The deaths from both of these diseases, however, are under the numbers for 1878, which were—whooping-cough 2,183, small-pox 873. Deaths from measles, which amounted to 3,212 in 1878, fell last year to 860, while deaths from scarlatina which had gradually declined from 4,034 in 1874 to 1,079 in 1878, rose last year to 1,688, which number, however, is 871 under the average for the preceding ten years.

Compared with the year 1878, there was an increase in deaths from zymotic diseases in the North-Eastern, North-Western, and South-Western Divisions, and a decrease in all the other Divisions. The respective rates for the several Divisions are:—Eastern, 396·86 in every 100,000 of the estimated population; South-Western, 321·15; North-Eastern, 235·77; South-Eastern, 211·83; South Midland, 189·79; North Midland, 186·54; North-Western, 181·26; and the Western, 180·47.

Of the 13,336 deaths from zymotic diseases, 7,697 or 57·7 per cent. were amongst children under 10 years of age, being equal to a mortality of 6 in every 1,000 children of that age.

TABLE VIII.—Showing, by DIVISIONS, the Number of Deaths from the principal Zymotic Diseases and from all diseases of that class registered in Ireland during the Ten Years 1869-78; the Average Annual Number for that period; with the Number registered in 1879, and the Rate represented thereby.

Small-pox.—There were 672 deaths from small-pox registered, being 201 under the number in 1878. Of the deaths from this disease 596 were in the Eastern Division (including 146 in the North Dublin and 379 in the South Dublin Union), 24 occurred in the Western Division (including 15 in Galway Union), 18 in the South-Midland, 16 in the North-Eastern, 7 in the North-Midland, 4 in the South-Eastern, 4 in the North-Western, and 3 in the South-Western Division. In the year 1876 only 24 deaths from this cause were recorded, and in 1877 only 71, but the average annual number for the ten years 1869–78 was 654.

In the province of Leinster the deaths numbered 624, in Connaught 24, in Ulster 21, and in Munster 3.

Measles.—Deaths from measles, which in the year 1878 amounted to 2,212, fell last year to 860; they are equal to an annual mortality of 16·04 per 100,000 persons. The disease was most fatal in the Eastern and South-Western Divisions, the annual rates per 100,000 persons for these divisions being respectively 34·41 and 33·66.

Scarlet Fever.—The deaths from this disease number 1,688, or 31·48 per 100,000 persons, against an average for the preceding ten years of 2,559 deaths. In all the Divisions, except the North-Western (in which there was an increase of 4 only), the deaths were below the average; but the total number for the year is 609 in excess of the number in 1878.

The deaths from scarlet fever in 1879 were distributed through the four provinces as follows:—Leinster, 610; Ulster, 503; Munster, 416; and Connaught, 99.

Diphtheria.—This disease proved fatal in 320 instances, being 24 over the number in the previous year, but only equal to the annual average for the 10 years 1869–78. In proportion to population, the highest mortality (11·51 per 100,000 persons), was in the Eastern Division, and the lowest (3·31) in the Western.

Quinsy.—This disease caused 224 deaths against 169 in the year 1878.

Croup.—The deaths from croup registered during the year 1879 numbered 1,193—688 males, and 555 females; in the preceding year this disease was the cause of 1,320 deaths.

Whooping-cough.—The deaths (1,938) from whooping-cough are 251 in excess of the average for the ten years, 1869–78, but 245 less than the number registered in the year 1878; they afford an annual rate of 36·14 per 100,000 of the estimated population. In proportion to the population the mortality was highest in the South-Western and North-Midland Divisions, the rates being 55·85 and 53·96 per 100,000 persons respectively.

Fever.—The number of deaths from the several forms of continued fever amounted to 2,862 (1,484 males and 1,378 females), equal to a mortality of 53·37 per 100,000 of the population; the average annual number for the previous ten years was 3,051; the number in 1878 was 2,945. The highest divisional rate per 100,000 persons in 1879 was 71·00 for the Eastern Division, which had also the highest average rate for the ten years 1869–78, and the lowest was 32·69 for the North Western Division.

There were only 8 Superintendent Registrars' Districts in which the deaths from fever equalled 1 per 1,000 of the population, viz.:—Newry, in the North-Eastern Division; Celbridge, Dublin, North, and Dublin, South, in the Eastern; Castlecomer, in the South-Midland; Oughterard, in the Western; and Millstreet, and Tralee in the South-Western.

In Leinster there were 787 deaths, or 0·61 per 1,000 inhabitants; in Munster 866, or 0·63 per 1,000; in Ulster 823, or 0·44; and in Connaught 386, or 0·47 per 1,000.

Of the deaths registered from fever, 753 were ascribed to typhus, 1,037 to typhoid or enteric, and 1,072 to simple continued fever, or vaguely as to "fever." The age periods 15 and under 20 years, and 20 to 25, were those in which fever proved most fatal in proportion to the living at the same ages; the former yielding a rate of 69·29 per 100,000, and the latter 72·62.

The lowest rate was 39·33 for the period "under 5 years old."

TABLE IX.—Showing for the year 1879 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the estimated number living at each Age represented thereby.

Erysipelas.—The deaths from erysipelas numbered 259, against an annual average of 306 for the preceding decade. In the year 1878 the number was 260. The highest mortality in 1879 in proportion to the population was in the South-Eastern Division, and the lowest in the Western.

Metria or Puerperal Fever.—The number of deaths from this disease registered in 1879 was 340, being 25 more than in the preceding year. The average annual number for the ten years 1869–78 was 353.

Influenza.—Seventy-four deaths were ascribed to this disease; the number in 1878 was 54, and the annual average for the ten years 1869–78 was 118.

Dysentery.—To this disease 148 deaths were attributed, being 41 less than in the previous year, and 130 under the annual average for the ten years 1869-78.

Diarrhœa.—The deaths from diarrhœa were below the average. The disease proved fatal in 1,526 instances, equal to a mortality of 28·46 per 100,000 of the estimated population; the deaths in 1878 numbered 1,949, and the average annual number for the ten years 1869-78 was 1,818. The highest Divisional rate in 1879 was 36·65 for the South-Western Division, and the lowest 17·02 for the North-Western.

The rates for the provinces were as follow:—Leinster, 27·5 per 100,000 persons; Munster, 36·8; Ulster, 28·0; and Connaught only 16·9.

Of the 1,526 deaths from diarrhœa, 398 were registered in the first quarter, 384 in the second, 374 in the third, and 370 in the fourth.

Simple Cholera.—Twenty-nine deaths occurred from this disease.

Three males aged respectively 9, 13, and 22 years, and three females aged respectively 1, 6, and 30 years, died from *Hydrophobia*.

II.—CONSTITUTIONAL DISEASES.

From diseases termed "constitutional" there resulted 17,148 deaths (8,156 males, and 8,992 females), affording a rate of 1 in 6·1 of all the deaths, and equal to 320 in every 100,000 of the population. This mortality differs but little from that for the previous year, or the average for the ten years, 1869-78.

Phthisis or Pulmonary Consumption proved fatal in 10,619 instances—4,981 males, and 5,638 females—being equal to 198·03 in every 100,000 persons; the average annual number for the previous ten years was 10,175.

As heretofore the North-Eastern and the Eastern Divisions yield the highest rates, and the Western the lowest. The rates for these three Divisions are—North-Eastern 268·48 in every 100,000 living; Eastern, 259·45; and Western, 124·02.

The rates for the four provinces are as follow:—Leinster, 231 per 100,000 of the population; Ulster, 228; Munster, 162; and Connaught, 142.

Of the total deaths from phthisis, 7,368, or 69·4 per cent, were of persons between 15 and 45 years of age.

In the first quarter there were 2,786 deaths registered; in the second 3,154; in the third 2,421; and in the fourth, 2,258.

[TABLE.

TABLE X.—Showing, by Divisions, the Number of Deaths from Phthisis or Pulmonary Consumption registered in Ireland during the Ten Years 1869-78; the Average Annual Number for that period; with the number registered in 1879, and the Rate represented thereby.

Mesenteric Disease.—The deaths from Mesenteric disease numbered 1,444—736 males and 708 females.

Hydrocephalus or Water on the Brain.—The deaths from this disease amounted to 1,127—640 males, and 487 females.

Scrofula.—To this disease 974 deaths were ascribed (531 males and 443 females).

Gout.—Only 29 deaths from Gout were registered (18 males and 11 females).

Cancer.—This disease caused 1,782 deaths, of which 784 were those of males, and 998 of females.

Dropsy.—Under this heading 995 deaths were tabulated (371 males, and 624 females).

III.—LOCAL DISEASES.

The number of deaths from "local diseases" registered amounted to 38,021 (20,321 males and 17,800 females), or 1 in 2.8 of the deaths from all causes; in 1878 the number was 34,508 (18,700 males and 15,808 females).

Diseases of the Nervous System.—From this group of diseases there resulted 8,868 deaths (4,884 males and 3,984 females), being 40% over the number in the year 1878. They include 3,700 from convulsions (nearly all children), 1,571 from paralysis, 1,102 from apoplexy, 683 from cephalitis or inflammation of the brain and its membranes, 378 from epilepsy, 351 from insanity, 4 (females) from chorea or St. Vitus's dance, and 1,079 deaths (including 213 from necrocephalus or softening of the brain, and 133 from spinal marrow disease) entered under "brain disease, &c."

Diseases of the Organs of Circulation.—Diseases of the Circulatory Organs caused 4,534 deaths (2,403 males and 2,131 females); in the previous year the number was 4,399. "Heart disease" caused 4,383 deaths, aneurism 92, and pericarditis or inflammation of the heart's covering, 59.

*Diseases of the Respiratory Organs.**—The deaths from these diseases amounted to 18,441 (9,427 males and 9,014 females), being equal to 343·90 in every 100,000 of the population. The average number for the preceding ten years was 13,481, the annual numbers varying from 11,419 in 1874 to 15,371 in 1878.

As in 1878 the Eastern Division had the highest rate, and the Western the lowest; the rate for the former division was 500·87 per 100,000 persons, and for the latter 228·86. Diseases of the respiratory organs were most fatal in the first quarter of the year, during which 6,734 deaths from these causes were registered; the number for the second quarter was 5,055; for the third 2,575; and for the fourth 4,077. As many as 13,824 of the deaths from these causes (6,733 males and 7,091 females) resulted from bronchitis; 2,530 (1,616 males and 914 females) were from pneumonia or inflammation of the lungs; 447 from asthma; 344 from pleurisy; 114 from laryngitis; and 1,182 were returned as from "lung disease," &c.

TABLE XI.—Showing, by DIVISIONS, the Number of Deaths from Diseases of the Respiratory Organs* registered in Ireland during the Ten Years 1869–78; the Average Annual Number for that period; with the number registered in 1879, and the Rate represented thereby.

1879.										

Diseases of the Digestive Organs.—These diseases contributed 4,201 deaths (2,216 males, and 1,985 females). They include 310 from gastritis or inflammation of the stomach; 488 from enteritis or inflammation of the bowels; 294 from peritonitis or inflammation of the covering of the bowels; 367 from ileus or obstruction of the bowels; 219 from ulceration of the intestines; 144 from hernia; 7 (5 males and 2 females) from fistula; 674 entered under "stomach disease, &c."; 234 (135 males and

* Exclusive of Phthisis or Pulmonary Consumption, for which see "Constitutional Diseases."

99 females) from hepatitis or inflammation of the liver; 157 from jaundice; 1,002 (including 180—103 males and 75 females—from cirrhosis) entered under "liver disease, &c."; and 17 from spleen disease.

Diseases of the Urinary Organs.—To the various affections of this order of diseases 1,424 deaths (1,029 males and 395 females) were ascribed. Of these deaths, 408 (257 males and 151 females) were from nephria or Bright's disease, 124 from diabetes, 105 from cystitis or inflammation of the bladder; 98 from nephritis or inflammation of the kidneys; 40 from ischuria or suppression of the secretion of urine; 20 from stone in the bladder; and 629 (of which 181 were ascribed to prostatic disease) entered under "kidney disease, &c."

Diseases of the Organs of Generation.—Deaths from diseases of the organs of generation numbered 144, including 71 from ovarian dropsy, 67 from diseases of the uterus, &c.

Diseases of the Organs of Locomotion proved fatal in 222 instances, and *Diseases of the Integumentary System* in 187; of the latter number of deaths, 4 were caused by phlegmon, 99 (62 males and 37 females) by ulcer, and 84 by various skin diseases.

IV.—DEVELOPMENTAL DISEASES.

The number of deaths from this class of diseases in 1879 amounted to 31,776 (14,656 males and 17,120 females). Of the 667 deaths from the first order of these causes, 280 were ascribed to premature birth, 384 to teething, 9 to cyanosis, 24 to spina bifida, and 20 to other malformations.

The deaths registered from the accidents of childbirth amounted to 571; the average annual number for the previous ten years was 595. If to these 571 deaths registered in the year 1879, the deaths from metria (340) be added, we have a total of 911 deaths of parturient women, or the death of one mother to every 149 births registered during the year; the average annual number for the ten years 1869-78 was 948, being equal to 1 in every 151 of the average annual number of births registered. Twelve deaths were tabulated under the head of paramenia.

The remaining deaths in this class are 24,908 (11,489 males, and 13,419 females) from "old age," and 5,618 from atrophy and debility.

V.—VIOLENT DEATHS.

The number of violent deaths registered during the year was 1,985 (1,364 males and 621 females), or 37.02 in every 100,000 of the population, being slightly under the average for the ten years 1869-78. Accidents or negligence caused 1,780 deaths (including 700 from fractures and contusions, 412 from burns or scalds, and 386 from drowning), there were 89 cases of homicide (murder and manslaughter), 90 of suicide, 2 executions, and 24 violent deaths which being vaguely returned were not classed.

[TABLE.

TABLE XII.—Showing, by DIVISIONS, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths), registered during the Ten Years 1869–78; the Average Annual Number for that period, with the number registered in 1879, and the Rate represented thereby.

Inquests.—There were 2,638 inquests reported to the Registrars during the year 1879, being 1 inquest to every 39 deaths registered.

In 272 instances of sudden death the cause was not ascertained.

In 1865 there was 1 death in every 19 registered which could not be classed, owing to the cause of death having been either ill defined or unspecified; in 1879 such deaths only equalled 1 in every 41.

AGES.

Deaths of infants under 1 year old numbered 13,646, being equal to 10.1 per cent. of the number of births registered.

Amongst children under 5 years of age 23,640 deaths occurred—a mortality equal to 36.3 in every 1,000 of the living at that age. Of these, 12,554 were boys and 11,086 girls; the former number representing 38.1 in every 1,000 boys, and the latter 34.5 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 11 per cent. of the living at that age.

Amongst the deaths registered are 378 of persons stated to have been aged 95 years and upwards—424 males and 454 females.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the year 1879 amounted to 47,065; of these, 25,807 were males and 21,258 females. Of the whole number, 6,125 were from Leinster; 17,255 from Munster; 17,619 from Ulster; and 6,066 from Connaught.

Of the emigrants in 1879, 11.1 per cent. were under 15 years of age; 77.9 per cent. were between 15 and 35 years old; and 11.0 per cent. were 35 or upwards.

PRICES OF PROVISIONS, AND PAUPERISM.

The average prices, in Dublin, of bread, potatoes, and beef in 1879 were slightly under those for the preceding year. Oatmeal was considerably cheaper, the mean price being under that for any of the ten years 1869-78. The average price of Messrs. Manders and Co.'s 4-lb. loaf was 7d., being 2d. under the average price in the year 1878; oatmeal averaged 14s. 3d. per cwt., being 2s. 9d. under the mean price for 1878. The average prices of potatoes ranged from 4s. 0d. to 6s. 9d. per cwt., against 4s. 9d. to 7s. 6d. in 1878; and those of beef from 57s. to 68s. per cwt., against 60s. to 76s.

TABLE XIII.—AVERAGE PRICES IN DUBLIN OF BREAD, OATMEAL, POTATOES, and BEEF, during the years 1869-79, and the AVERAGE NUMBER OF PERSONS IN IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during each quarter of the year 1879.

YEAR.	Average Prices of Provisions.				PAUPERISM.	
	BREAD (Messrs. R. Manders & Co.'s 4-lb. Loaf).	OATMEAL (Cook Exchange), per Cwt.	POTATOES (at Potato Market), per Cwt.	BEEF (at the Dublin Cattle Market), per Cwt.	Average NUMBER OF PERSONS RELIEVED.

Surveying the period covered by the several Tables in this Report, *i.e.*, 1879, and the ten years preceding, it is found that beef was lowest in the year 1869, when the average prices ranged from 53s. to 69s. 6d. per cwt.; bread in 1869 and 1870, for each of which the average price of Messrs. Manders' 4lb. loaf was 6½d.; oatmeal in 1879, when the average price was 14s. 3d. per cwt., and potatoes in 1875, when the average range of prices was from 2s. 11d. to 4s. 7d. per cwt. The highest average price

of bread was 8d. in the years 1872-3-4-7; of oatmeal, 18s. 8d. in 1874; the highest range for potatoes, 4s. 6d. to 8s. per cwt. in 1873, and for beef, 64s. to 82s. 6d. per cwt. also in 1873.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates in Ireland on Saturdays during the year 1879 was 52,003, being 3,657 over the average for the preceding year; and that the average number of persons receiving out-door relief was 39,221, or 3,425 over the corresponding number for 1878.

THE WEATHER.

The following particulars have been extracted from Returns of Meteorological Observations taken during the years 1869-79, at 40, Fitzwilliam-square, West, Dublin, by J. W. Moore, M.D., Univ. Dub., F.R.Q.C.P., Observer at Dublin for the Meteorological Office, London.

The mean Atmospheric Pressure has been obtained from daily readings of the barometer at 9 A.M. and 9 P.M., corrected and reduced to 32° Fahrenheit at the mean sea level. The Mean Temperature values have been deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's Formula, viz., $\text{min.} + \{\text{max.} - \text{min.} \times .41\}$ = Mean Temperature. The per-centage Amount of Cloud has been deduced from observations made three times daily—at 9 A.M., 3 P.M., and 9 P.M.—for the years 1869-1874 inclusive, and from observations made twice daily—at 9 A.M. and 9 P.M.—for the years 1875-1879 inclusive. The Rainfall is that measured daily at 9 A.M. A rainy day is one on which at least one-hundredth (.01) of an inch of rain fell within the twenty-four hours from 9 A.M. to 9 A.M.

The Mean Height of the Barometer during the year 1879 was 29.923 inches. The highest observed reading was 30.717 inches, at midnight on December 12th. The lowest observed reading was 28.820 inches, at 3 P.M., on February 10th. The extreme range of atmospheric pressure was, therefore, 1.897 inches.

The Mean Temperature of the year, deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's formula, was 46.4°. The highest reading was 73.6° on July 23th; the lowest reading was 21.2° on January 12th. The average mean temperature for the years 1869-78 calculated in the same way, was 49.1°. The mean temperature, deduced from the daily readings of the dry bulb thermometer at 9 A.M. and 9 P.M., was 47.0°.

Rain fell on 208 days, including snow or sleet on 32 days, and hail on 48 days. The average number of rainy days in the years 1869-78 was 190.5. The total rain-fall measured 28.858 inches, compared with an average of 28.340 inches in the years 1869-78.

As regards the Direction of the Wind, 739 observations were made during the year, with this result—N., 47; N.E., 50; E., 91; S.E., 80; S., 46; S.W., 97; W., 200; N.W., 76; Calms, 43.

The first nine months of 1879 were characterised by a persistently low mean temperature, unusually clouded skies and deficient sunshine, and a rain-fall both considerably in excess of the average, and also distributed over 174 out of 273 days. The average number of rainy days in the first nine months of the ten years ending 1878 was 143.8, or 30 fewer than in 1879. In the fourth quarter of 1879 rain fell on only 34 days, compared with an average of 52.7 rainy days in the corresponding period of the previous ten years. The last quarter of the year was cold but dry, with a remarkably high atmospheric pressure, the mean height of the barometer during the three months ending December 31st being 30.223 inches, or more than a quarter of an inch above the average.

A general review of the year 1879 shows that the annual mean temperature was nearly 3° below the average (46.4° compared with 49.1°); the amount of cloud was 7.6 per cent. above the average (67.4 per cent. compared with 59.8 per cent.); the rain-fall was only half an inch in excess of the average (28.858 inches compared with 28.340 inches); and the rainy days were 208, compared with an average of 196.5.

TABLE XIV.—Showing the average Monthly Mean Temperature, Amount of Cloud, Rain-fall in Inches, and Number of Rainy Days for the Ten Years 1869–1878 inclusive; and the Monthly Mean Temperature, Amount of Cloud, Rain-fall in Inches, and Number of Rainy Days for the year 1879.
[For detailed Table for 1879, see page 32.]

* For nine years only, the observations for January and February, 1869, being wanting.

In presenting this report to your Excellency it is necessary to mention that nearly all the records to which it refers were compiled under the direction of my predecessor, the late Dr. Burke.

Dr. Burke's death took place in the month of August, 1879, and it may not be out of place here to state that during his short tenure of office he did much to increase the efficiency of this department, to reduce its expenses, and to enhance the value of its reports and publications. His firm and courteous administration of the department made him universally respected and esteemed by all who served under his direction.

It has already been pointed out that the number of deaths registered has increased considerably in the year 1879 as compared with preceding years, in consequence of the facilities afforded to the Registrars by the working of the Public Health Acts of 1878 and 1879. By section 191 of the former Act "the Clerk, or Secretary, or Registrar to every Burial Board and Cemetery Company, or other authority having charge of any burial ground," was required to make "at such times, and in such manner as the Local Government Board may direct," returns of particulars concerning the persons whose bodies are buried in cemeteries in Ireland, to the "Registrar of the District" in which the persons resided at the time of their deaths. By the latter Act the destination of the return was extended to the "Registrar-General" or to the "Registrar of the District," at the discretion of the Local Government Board. The order for making these returns, from the 1st of January, 1879, was issued to the authorities of the four principal Dublin cemeteries early in the year, and the arrangement having proved highly beneficial to promoting more correct registra-

tion, the Local Government Board on the 13th November issued orders enforcing the making of these returns upon the authorities of all cemeteries throughout Ireland. The full effect of the working of these clauses of the Public Health Acts will not be apparent until the records for the year 1880 are compiled, as an increased registration of deaths may be expected.

During the year it became the duty of this department also to co-operate with the Local Government Board, in enforcing the provisions of the Vaccination (Ireland) Act, 1879, which became law on the 15th of August. The duties of this department in connexion with this and the other Vaccination Acts consist in preparing and issuing the various forms and notices which are necessary for the working of the Acts, and supervising the registration of vaccinations.

I have the honour to be

Your Excellency's faithful servant,

THOS. W. GRIMSHAW,
Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
Dublin, 16th August, 1880.

METEOROLOGICAL OBSERVATIONS

TAKEN AT

40, FITZWILLIAM SQUARE, WEST, DUBLIN, IN 1879.

By J. W. MOORE, Esq., M.D., Univ. Dub., F.R.Q.C.P.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS taken at 40, Fitzwilliam-square, West, Dublin,
during the year 1879, by J. W. MOORE, M.D., Univ. Dub., F.R.C.S.P.

Long. $6^{\circ} 15' W.$; Lat. $53^{\circ} 20' N.$; Height above Mean Sea Level, 51 feet; Thermometers, 4 feet above ground; Rain Gauge, 3 feet 4 inches above ground.

Topographical Description of the Eight Divisions into which Ireland has been divided for Statistical purposes.

No. I., **THE NORTH-EASTERN DIVISION.**—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carrlingford Lough; the north and east being on the seaboard.

No. II., **THE NORTH-WESTERN DIVISION,** is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S. W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Louth, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysodare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III., **THE EASTERN DIVISION,** is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrington, in the county of Down, to the south of Calver Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV., **THE NORTH MIDLAND DIVISION,** is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V., **THE SOUTH MIDLAND DIVISION,** situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Berris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty mountains, and in a north-westerly direction, to Pollagrossa, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI., **THE WESTERN DIVISION.**—This division extends southwards from Sligo and Killybegs Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Runway Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and harbours. This division has been extended much more to the west than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castleknock, Glennamaddy, Mountbellew, Bullfinch, and Portlaoine.

No. VII., **THE SOUTH-EASTERN DIVISION.**—This division extends from its junction with the "Eastern" division, southward of Calver Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county.

No. VIII., **THE SOUTH-WESTERN DIVISION,** extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the county of Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)
estimated to the middle of each of the Years 1801 to 1879, inclusive:—

1827	7,361,760	3,406,703	3,955,057								

NOTE.—This table has been constructed for the years 1801 to 1871—By adopting the rates of increase of the male and female population between 1851 and 1861, as shown by the Irish Census Reports of 1861—the first complete Census of Ireland having been taken in 1851.

1852 to 1861—By adopting the rate of increase between the population of 1851 and 1861, according to the Irish Census Report of 1861.

1862 to 1871—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Immigration Commissioners in England.

1872 to 1879—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1871; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1861 over the actual population according to the Census of that year.

1880 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872 to 1879—By assuming the average annual excess of births over deaths to equal 1 per cent. of the population, and deducting the number of emigrants according to the returns obtained by the Registrar-General.

ANNUAL ABSTRACTS
OF

* For remainder of Belfast see next page.

N.B.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Sanitary Districts of the same names, except in a few instances.

The letter W. denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the columns headed "Excess of Births over Deaths," it denotes that the Births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

L.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1879.—REGISTRARS' DISTRICTS—continued.

IRELAND.—SUPPLEMENTARY TABLE of the

[In the Tables of Causes of Deaths, pp. 102-109, all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 116 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired
